## CHANGING THE FUTURE OF FETAL ALCOHOL SYNDROME TOGETHER

It's been 40 years since the discovery of Fetal Alcohol Syndrome (FAS), yet 1 in 13 women still drink alcohol during pregnancy (*source: CDC*).

### What have we learned?

Join Kenneth Lyons Jones, MD, one of two researchers who discovered FAS in 1973 as he and his special guests tell their stories of how FAS has affected their lives, what we know about the disorder today, and what needs to change in order to prevent prenatal alcohol exposure from continuing to affect an alarming 1 in 100 people (*source: NOFAS*).

Don't Miss The Rare  
Opportunity To Hear  
Their Stories...
